

Creating a Gradations Supply List

Love the look of ombre or gradation fabrics? Explore creating a similar effect with your own fabrics. Put your fabric stash or scraps to work and give your next quilt project a unique look and a sense of movement. In this hands-on class, we will look at examples of projects (like the one to the right) using this technique, and create some sample gradations using fabrics supplied in your kit (every kit is different!). Come ready to share, swap and exchange fabrics from your class kit for a fun experience!

A separate handout includes a sample project suggestion to apply what we discuss!

Required Kit:

The required kit includes a selection of fabric scraps (to use and/or trade to create your own sample gradation), a color wheel and a handout with a suggested sample project. Easy peasy!

Recommended: pen/pencil and paper for notes
