

The Lacemaker Woman Flowers

The freedom of being able to create your own embroidery, with lightness, creativity and mixing many materials.

A very therapeutic class, where techniques and forms are mixed, in a seductive game of just being free and creative. In an organic way, the repetitive motion of going around the various sizes has a calming and almost hypnotic effect, making it not only an artistic endeavor but also a therapeutic one.

There is no need of prior knowledge, just a good mood! We embroider what our souls reflect!

Student supply needs
