FLOATING PEACEFUL OCEAN ART QUILT

In this class you will create a peaceful underwater ocean scene. Colorful dimensional fish gracefully float along the corral. In addition, several dimensional objects make this art quilt stand out.

Everything you need to complete this class in three hours is included in the kit. There are a variety of colorful fish and ocean objects ready for you to create a gorgeous art quilt.

There are aspects within the ocean scene that float away from the background. This floating technique creates a surprising and original dimension to the art quilt.

This is a great class for beginners to advance since you get to create everything your way.

The Kit: Everything is included in the kit. The kit contains all the colorful fish ready to be cut out and float in the peaceful ocean. There is a rich variety of colorful objects to create corals, and other places for the fish. Let your imagination run free creating your underwater scene.

All the directions and supportive pictures are included in the kit. I encourage you to bring your own (small) embellishments to add. Remember, everything is already in the kit, but if you have special memories you want to add, bring the objects to class.

YOU WILL NEED TO BRING:

Pen or pencil and notepad for notes

A glue stick

Scissors to cut fabrics

Light to medium grey sewing thread and sewing needle

Straight pins

Craft (paper) scissors to cut floral objects for the ocean scene.

Optional tweezers to move fabric and objects around on your background.

Your own (small) special objects for the ocean scene.

Quilt Festival Education Department provides irons and ironing pads in all classrooms.

Feel free to video my demonstrations and take pictures during the class.

I will answer all your questions in class, or you can reach me at Rita@RitaLynneStudio.com
